

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

Claim 1 (Currently Amended). A shaped body, comprising:

a supporting gel layer comprised of a polyurethane polymer gel shaped with integral supports on its upper side which are spaced apart from each other via expansion channels;

a polyurethane foam layer resting on the integral supports of the supporting gel layer; and

an upper covering on an upper side of the polyurethane foam layer, where the expansion channels are covered with the polyurethane foam layer or are at least partially filled with integral projections protruding from a lower side of the polyurethane foam layer and entering into the expansion channels,

and wherein the polyurethane foam layer is bonded to the supports of the supporting gel layer by an adhesive.

Claim 2 (Previously presented). The shaped body as claimed in claim 1, wherein the integral supports are at a narrower distance from one another in the region of the pressure peaks which occur under load.

Claim 3 (Previously presented). The shaped body as claimed in claim 1, wherein the integral supports are of columnar design.

Claim 4 (Previously presented). The shaped body as claimed in claim 1, wherein said expansion channels are partially filled with integral projections protruding from said lower side of the polyurethane foam layer which enter into the expansion channels of the supporting gel layer.

Claim 5 (Previously presented). The shaped body as claimed in claim 1, wherein the upper covering is a spacer knit which consists of two textile surfaces
